### **About This Game**

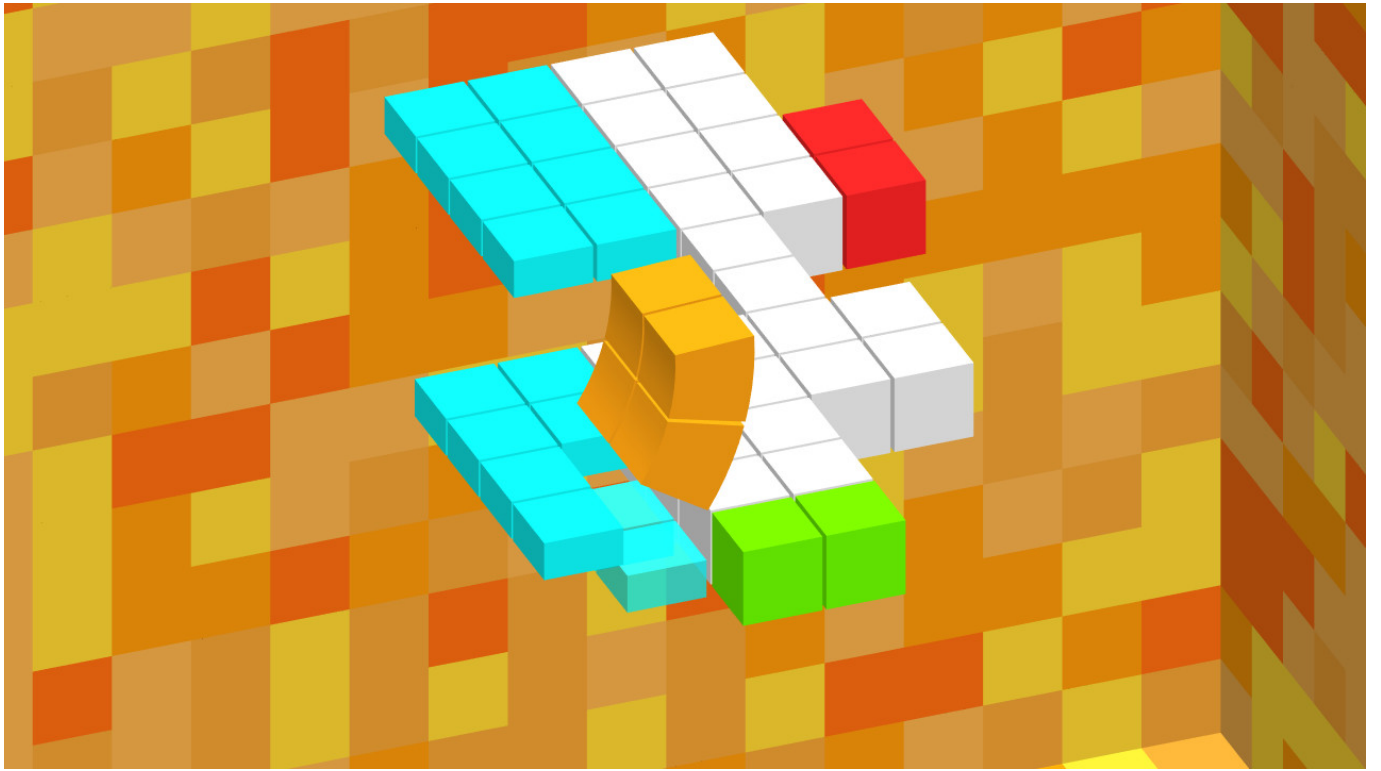

Breezablox is an addictive puzzle game where the objective is to reach the end cube without moving off the platform. Special cubes throughout the puzzles will trigger different actions on the platform to aid you with progressing. With 150 challenging puzzles to complete, your brain will be plenty busy.

I enjoyed the game. Well worth it for the purchase price. The game needs interface improvements. There is a somewhat lack of options and in order to change resolutions you must restart the game. Your required to select a resolution size prior to launching the game. This is somewhat annoying. Considering if you don't like the selected resolution you must restart. Game interface and the level joining relatively easy no complaints. Game just needs better options.. Fun and quite challenging at times. I played a similar game on the PS3 and absolutely fell in love with that version, my friends would come over just to help complete levels. While this version didn't have quite the same impact on me, the gameplay is on par and I would highly recommend picking up this version if a good challenge appeals to you.. Good puzzle game.. It is a really good game if you like puzzle games. But if you don't like puzzle games then don't get this game.. Good puzzle game.. I enjoyed the game. Well worth it for the purchase price. The game needs interface improvements. There is a somewhat lack of options and in order to change resolutions you must restart the game. Your required to select a resolution size prior to launching the game. This is somewhat annoying. Considering if you don't like the selected resolution you must restart. Game interface and the level joining relatively easy no complaints. Game just needs better options.

The game certainly challenged my brain, and it keeps me busy for hours, but on some levels it didnt make sense, however I just wasn't thinking hard enough.

The BEST GAME IV'E EVER PLAYED. :) :) :) :) :). This game is awesome, its so soothing, and I found myself having a hard time at some points. Very worth it. This game is really nice :D I really love the idea behind plus the nice graphics! I cant say that theres something that I dont like.. Or maybe just the fact that I finished almost every level in under 1 hour :D But still, this game is really fun and relaxing to play! Hope to see an update soon!. Quick! More levels! I'm suffering from withdrawal over here!. Not really impressed by this puzzle game. Pushing a block that tumbles around on top of other blocks, and has to land on a specific place in a specific position, was not quite my definition of fun.. Very nice, civil game. Enjoyed
